## Leadership

## Setting Global Standards

Peterson Spring CIMA is part of a long and successful history.

Peterson Spring, an
international group of
Peterson American companies, is the largest privately owned spring making group in North America. Peterson Spring has more than 15 manufacturing plants and a number of speciality operations located in the United States, Canada, Mexico and Japan.

Peterson Spring CIMA
specializes in the engineering and manufacturing of hose clamps for automotive, appliance and industrial needs. We can offer our clients unexcelled service and quality.
Asserting world class manufacturing requires an unwavering commitment to our customers needs . . . and we deliver.

## Manufacturing

## High Volume

And Cost Effective Production

Our proven forming techniques in state of the art, custom designed machines, creates the highest quality along with the maximum volume requirements of our largest customers. The forming of these special alloy spring materials, combined with the in-house heat treatment and DACROTIZED process for superior corrosion
protection all add up to make the CIMA hose clamp the finest product on the market. We produce over 75 million parts per year now, and we are currently increasing future production with new equipment and technology to meet the ever growing needs of our customers. We stock the largest dual wire hose clamp inventory in North America.

## Quality Assurance

## Consistency And Total Reliability Is Engineered Into Every Clamp

Peterson Spring engineers have successfully developed a unique, high tensile spring alloy material used in the production of CIMA hose clamps. In house CAD systems result in the design control of specific tooling and products used in production. Quality assurance is built into every CIMA hose clamp through extensive training of
our employees and their dedication to strict quality procedures. This is supported by our customer certified laboratory and custom designed, strain gauge.

Benchmarking ourselves against our own past performance assures our continued leadership and superior performance in our industry.

## Applications

Asserting world class manufacturing requires an unwavering commitment to our customers needs . . . and we deliver:

| CIMA Pliers have been | while increasing assembly |
| :--- | :--- |
| designed by us to meet | speed and assuring |
| customer needs. They | consistent clamp |
| lower production costs by | applications to our |
| decreasing physical fatigue | customers specifications. |

## Diameter B/C

After being expanded to no greater than " A " diameter of gauge, the clamp must be round within " G " gauging dimension at " $B$ " and " $C$ " diameter.

## Diameter A/D

The clamp when opened must pass over the " $A$ " diameter. In order to be sure that the permanent set suffered by the material after assembly is within the prescribed limits; after passing over no greater than the " A " diameter of the gauge, the clamp in the relaxed posture shall return to no greater than the " $D$ " diameter at its narrowest point.
