Re: New Proposition 65 warning label requirements

Peterson American Corporation (PAC) gives notice to its customers that our products may result in an exposure to Proposition 65 listed chemicals and must carry the appropriate warning label. This information is provided without any representation or warranty, expressed or implied, regarding the accuracy or correctness.

Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted as a ballot initiative in November 1986. The proposition protects the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals.

If you have any questions concerning PAC's compliance to the Prop 65 program, please contact your Peterson representative for assistance.

Sincerely

Timothy Demske
