

Peterson Spring Environmental Mission Statement:

Peterson Spring's Mission is to be an example in sustainability while continuing to invest in innovative technologies, the community and customer partnerships, as part of our ongoing commitment to a socially responsible environmental stewardship.

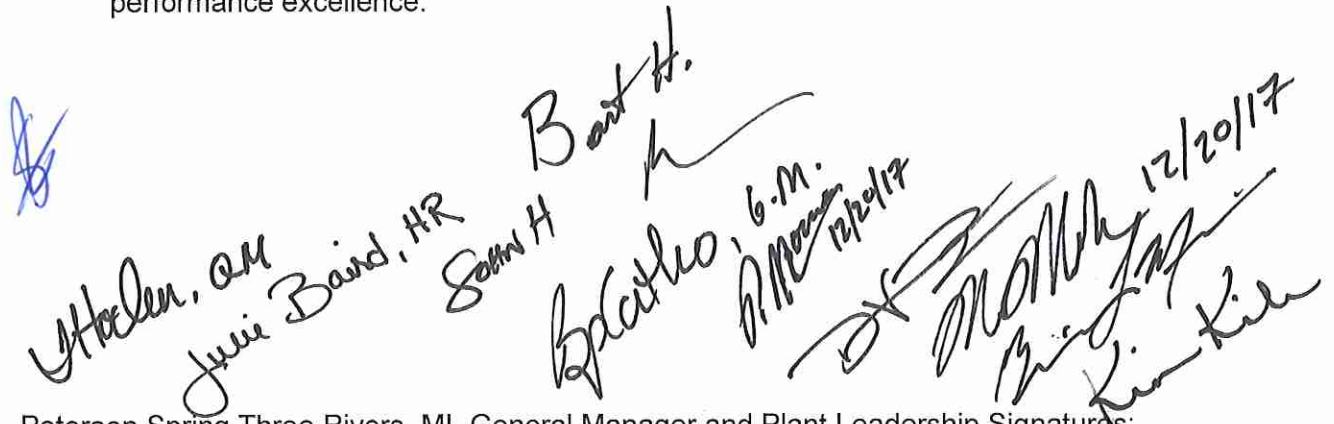

We are committed to meeting or exceeding environmental laws, regulations and corporate goals.

We pledge to reduce pollution by managing our suppliers, materials, processes and people in a responsible manner, thereby protecting the environment and providing a safe working environment.

We will strive for continual improvement by periodically updating environmental objectives.

Peterson Spring – Three Rivers Environmental Policy Objectives:

- Joint effort with our stakeholders and interested parties in protecting our environment through communicating and sharing our Environmental Policy and action steps.
- Work to conserve natural resources helping to preserve our earth.
- Prevent pollution (air, water, land and noise) by complying with relevant legal, regulatory and statutory requirements by identifying and reducing risks.
- Determine environmental aspects of all activities, services and products and their associated environmental impacts, considering life cycle perspectives and taking into account changes and ongoing developments.
- Focus our environmental objectives and targets on continual improvements.
- Leadership commitment to evaluate the effectiveness of environmental objectives and monitor established metrics to achieve the intended results of environmental performance excellence.
